BE- Computer Science And Engineering

Sri Raaja Raajan College Of Engineering / 09/2020 - 03/2024

karaikudi, sivangangai.

Projects

Holy Cross - school management

07/2025

Kalainger salai, alangudi, pudukkottai

Holy Cross Matriculation School Website

Tech Stack: React.js, JavaScript, HTML, CSS, Bootstrap / Tailwind CSS, Vercel

- Developed a responsive and user-friendly school website for **Holy Cross Matriculation** to provide students, parents, and visitors with easy access to essential school information.
- Designed and implemented multiple sections such as **Home, About Us, Academics, Facilities, Gallery, Announcements, and Contact** to create a complete digital presence for the institution.
- Built a clean and structured frontend interface with focus on **readability, accessibility, responsive design, and smooth navigation** across desktop and mobile devices.
- Organized school-related content in a clear manner so users can quickly view **institution details, academic information, infrastructure, achievements, and important updates**.
- Improved the school's online visibility by creating a professional web presence that simplifies communication and information sharing with parents and students.
- Applied reusable UI components and modern frontend development practices to make the website maintainable, scalable, and easy to enhance in the future.
